

Computer Tested Alternator

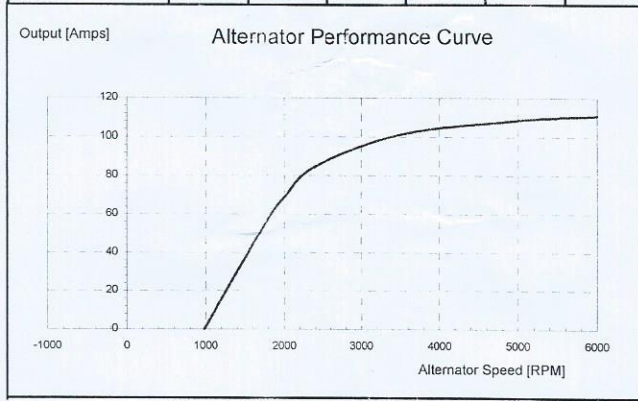

7294-3N

12V, 94A, NEG

Alternator test sequence:	Results:
Maximum Alternator Output:	111 Amps
Maximum Output Power:	1498 Watts
Voltage Regulator Set Point	14.9 Volts
Leakage Current Tested @ 12 V	0.57 mAmps
Ripple Current @ 2500 RPM	30 Amps
Turn On Speed Less Than	1600 RPM
Voltage regulator functions test:	Within specs

Output tested @ 13.5 V

Alternator RPM	1800	2000	2400	3500	5000	6000
Amperage	58	69	85	101	109	111

*We certify these results are within specifications.
